

## Submission guidelines for Poster and Research Design Presentations

Guidelines for the **proposal** of your **poster** or **research design presentation**:

We invite you to submit a proposal for a poster or a research design presentation. The poster may contain completed work or work in progress (e.g., early-stage PhD candidates).

- Proposal in either format needs to be submitted as a **structured long abstract**. The proposal should not have a separate title page (first page) but rather present the following items in consecutive order, considering the indicated word limits.
  - Start with the logo of the Congress and **title** of your contribution using Title Case (i.e., starting each word with a capital letter and continuing in lowercase).
  - A short **abstract** (max. 150 words) that gives a clear idea of the problem statement, research question, the methods (to be) employed and, for a poster, the main conclusion.
  - A maximum of five **keywords** (lowercase letters), separated by commas.
  - Explain in three sentences why the **content** of the submission is **suitable for a visual presentation as a digital poster/design**. Keep in mind that if your proposal gets accepted, you will present a poster/design digitally on **one slide only**.
  - **A problem statement** (max. 100 words) detailing what issue(s) you are investigating.
  - **Research question(s) and objectives** (max. 100 words) that explain what the research is trying to achieve, and which contribution(s) are made to the existing literature.
  - **Methods** (max. 300 words): brief outline of the methodology or the research design.
  - **Data** (max. 200 words): a brief description of the data used in the research for the poster or the anticipated data collection procedure and sampling for the research design presentation.
  - **Results** (max. 400 words): outline of the main results and conclusions. (Note: does not apply to research design)
  - Collect **References** at the end of the proposal. Please refer to the [European Review of Agricultural Economics](#) style.
  - **Do not add** any extra sections or appendices and **do not use footnotes**.
  - Tables and figures, if applicable, should be placed in the text near their citation. Number tables and figures consecutively. Type captions with an initial capital only.
- Please use a serif font type such as “Times New Roman”, font size 12, line spacing of 1.5 lines, and normal margins (2.5 cm on all sides).
- In the final presentation, we encourage you to include a QR code with further information (after acceptance of the proposal).

**Necessary additional information** to complete the online submission:

- Title of the contributed poster presentation/design
- Author(s): name, ORCID, affiliation, contact details
- Abstract (max. 150 words): should be repeated verbatim from your proposal
- Keywords (max. 5): should be repeated verbatim from your proposal
- You will need to select a maximum of 4 topics that best suit your poster or research design presentation from a predefined list
